Release planning eCertis 2024

Release 2024.01

- Use of UUIDs
- Improvement of the search bar
- Mark data as inactive
- Add filter for inactive data

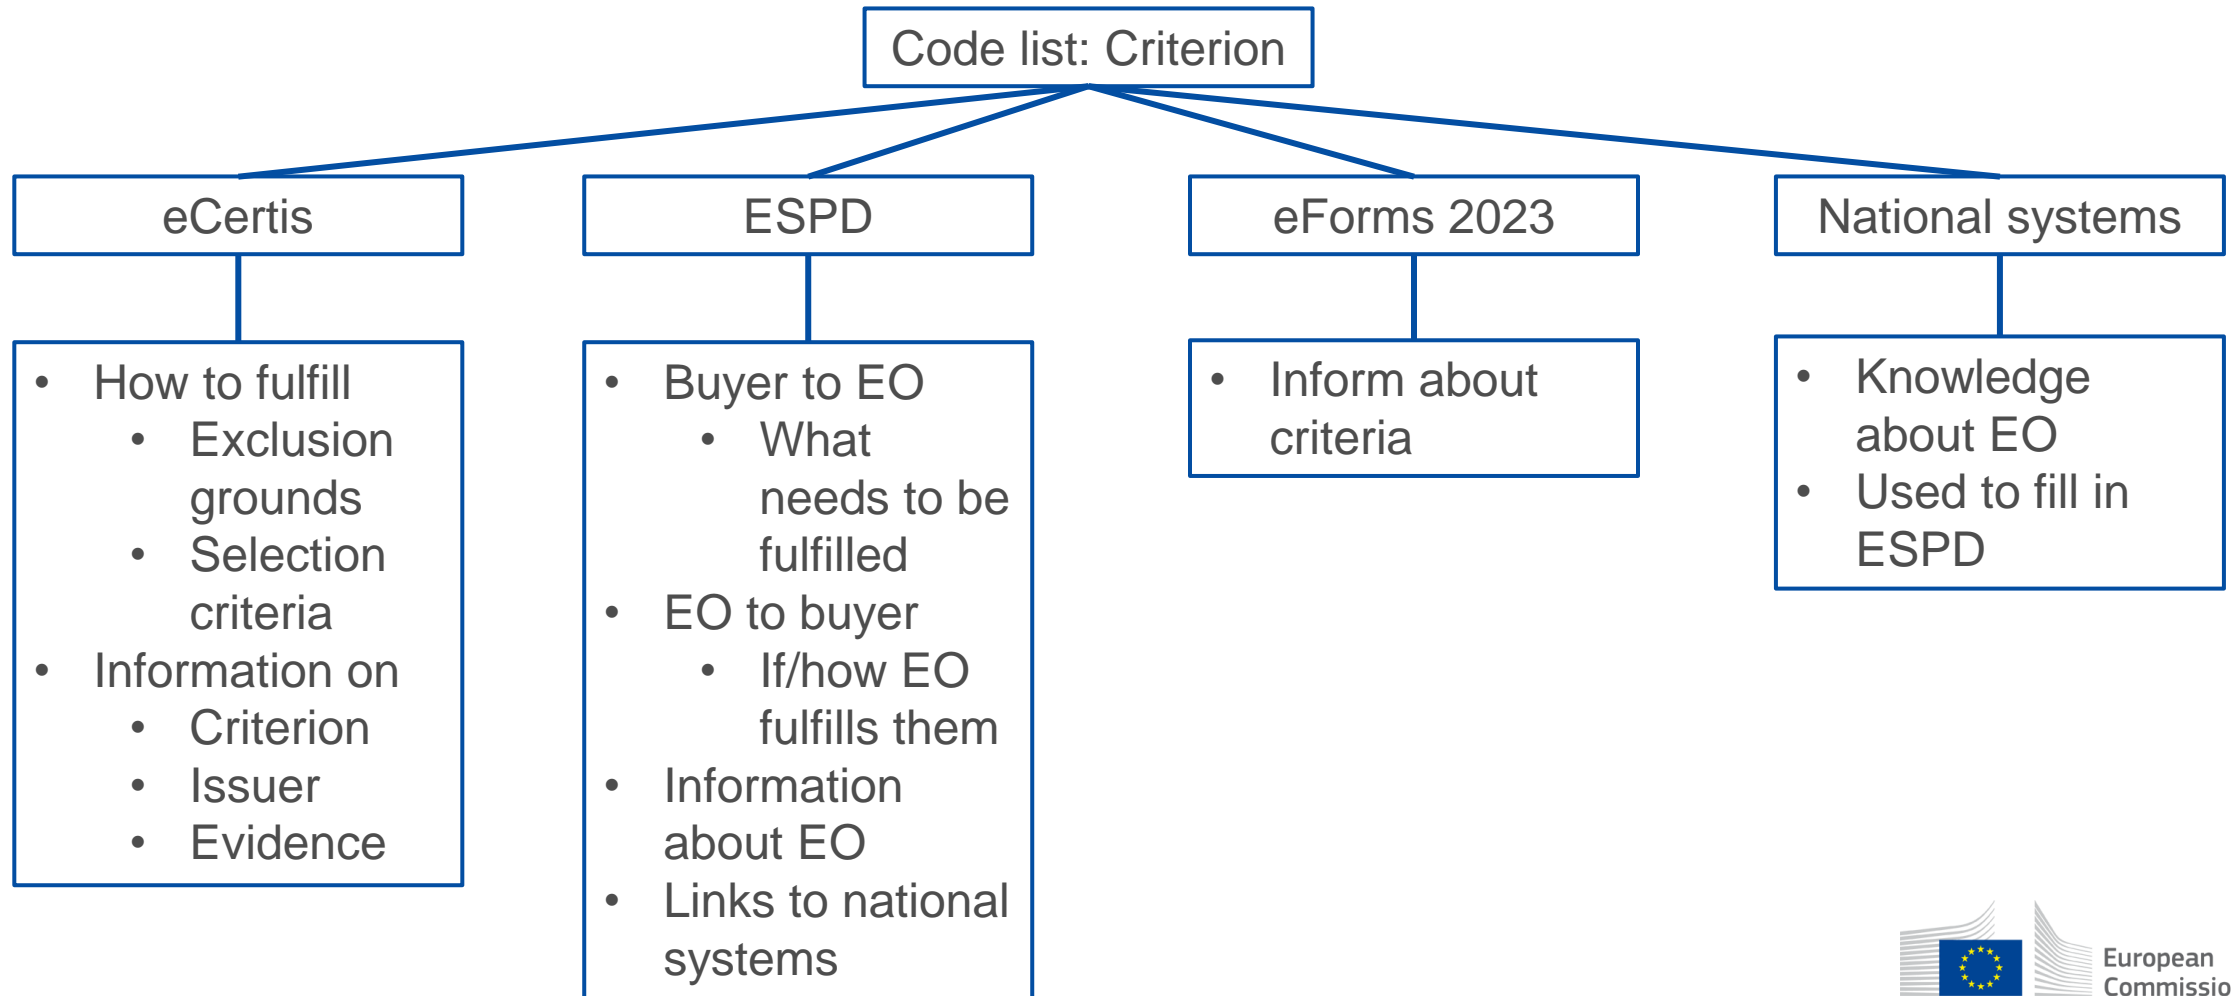

Release 2024.02

- Provide generic evidence
- Link evidence to a specific scenario
- Create “subcriteria” for purely national exclusion grounds
- Use of hash-value for user personal data
- Possibly: Assign a “Super-admin” for each MS

Release 2024.03

- Corrective maintenance after previous releases
